

SAM Readiness

Achieving Cost Savings on Your Software

Start saving on your software license cost now and find out how LicenseWatch can help you. LicenseWatch is the only provider of Software Asset Management solutions that can effectively help organizations fast and easy and cost effective.

ABOUT LICENSEWATCH

LicenseWatch provides you with cost effective control and compliance.

KNOW WHAT YOU HAVE

Our leading technology quickly tells you what software you have installed, how it is used, and what licenses you have to support this.

QUICK Service Delivery

Simple and quick installation on one of your (virtual) Windows servers can be done in half a day. Inventory building and application metering will start from day 1.

IMMEDIATE COST SAVINGS

Find out quickly where you can save on licensing and support costs by identifying where unused software is installed.

SERVICES AVAILABLE

SAM Readiness Service
Installation and Setup
Maintenance
Software Recognition Service
Technical Support
Guaranteed Warranty

Save 5-15% on the budget

When you want start saving on your software licenses it is primary important to find out what software is installed and how it is used. Many users will have software installed on their computer that they never use.

Organizations can save serious money by not renewing unnecessary maintenance and/or support or not buying new licenses that can be harvested somewhere else. Research by Gartner showed that savings can be expected between 5 and 15% on the total software budget.

Full usage report the easy way

Without the need of buying and implementing a full Software Asset Management solution, the LicenseWatch SAM Readiness is a service that delivers customers with a full report on usage of the 400 most popular commercial software applications in the customer's environment.

Within 60 days a full report will be delivered that will show where software is installed and how it is used. This report will tell you where there is software that is unused and where cost-savings can be achieved.

A complete overview

With SAM Readiness service, LicenseWatch customers within 60 days will have a complete overview what commercial software is installed where and how it has been used during that time.

In the 60 day period the service will be able to do metering on any of the 400 most popular software applications on all Windows computers on the network. Then the LicenseWatch team compiles information gathered into a comprehensive report that can be used to optimize your software licenses or as an software usage report for Software Vendors.

Contact us

Contact your local LicenseWatch office or visit www.licensewatch.com for more information or request a demonstration.

Key benefits

- Provides immediate savings on your software license costs
- Optimizes your software licenses
- Avoid software overspending
- Average Savings between 5 and 15% on Software Estate (Gartner report)

LicenseWatch

Deliverables

The SAM Readiness service is focused on revealing possible savings on your software assets. This is reflected in the deliverables from the service. Following reports will be delivered:

- Overview report of total value of unused software per software title
- List of computers that with unused software per software titles
- List of unused software titles per computer

The data will be cleaned and normalized using the LicenseWatch Software DNA. Since the monetary value of the software is also included in our Software DNA, we can report the value of software that is unused.

System requirements

- (Virtual) Windows Server 2003/2008/2012 with IIS, .NET 3.5 SP2 installed
- Access to a MS SQL Server 2005/2008/2012 database.
- Supports all current Windows OS versions
