

LicenseWatch for CapalInstaller

Enrich your valuable CapalInstaller data with intelligent license and asset information with the new LicenseWatch integration. No matter if it is installed locally, on virtual machines or on the web.

Start saving money on your software licenses today and eliminate incompliance risks by using LicenseWatch. It is quick to implement and easy to use. Our customers see an average Return On Investment between only 3 and 6 months. Join over 900 other customers worldwide.

ABOUT LICENSEWATCH

LicenseWatch provides you with cost effective control and compliance.

KNOW WHAT YOU HAVE

Our leading technology quickly tells you what software you have installed, how it is used, and what licenses you have to support this.

QUICK TO IMPLEMENT

With LicenseWatch there are no lengthy and costly deployment projects. Typically installed and configured within one working day, you can quickly start gathering your software information.

EXTENSIVE REPORTING

The reporting capabilities in LicenseWatch provides with the necessary information about your assets with up to date accuracy. With over 100 pre-defined reports and a Report Wizard, well informed decisions can now be made. All reports can be exported to Excel, Word or PDF format.

Cost Saving

With the LicenseWatch solution you know what software is being used and what software can be removed. Licenses can be reharvested; saving the costs of buying unnecessary new licenses or prevents costs of renewing maintenance on unused licenses. Furthermore, the advanced license program knowledge inside the tool helps organizations to get more out of their licensing agreements.

Minimize Risk

Installing software on computers in organizations by users can expose those organizations to compliance risks. Apart from the financial implications on incompliance like unbudgeted license costs and fines, an organization is also faced with lost productivity and image damage because of bad press. LicenseWatch makes it possible to prevent installation of unwanted software and gives information on what software is installed where and how it is actually used.

Features and Benefits

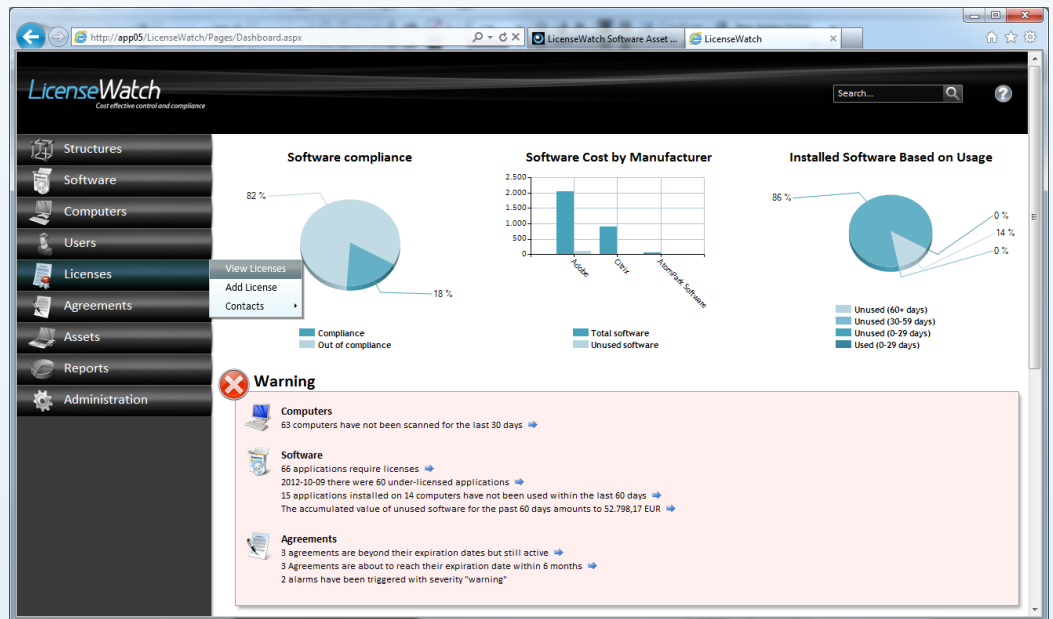

LicenseWatch obtains the inventory data directly from CapalInstaller and provides software recognition, contract and license management and powerful reporting.

It can save organizations hundreds of hours work interpreting raw inventory and usage data, optimizes contract and licensing agreements and giving up to date compliance reports. The LicenseWatch VMware and Citrix integrations will enrich inventory and usage data with necessary data from these virtual platforms to ensure license compliance at all times. All reports can be exported for use of internal reporting. With the report wizard users can create their own reports as they wish.

Integration

It is possible to combine inventory sources like Apple Mac OS/X, Unix and Linux agents with CapalInstaller data. This creates one central SAM solution for your complete IT infrastructure.

- Identifies where savings in software licenses can be achieved – up to 25%
- Eliminates incompliance risks
- Optimize the returns on your software assets
- Get more out of your software agreements
- Better management decisions on software investments

Quickly determine what software you have installed and how it is used

Virtual environments

Managing your software assets in a virtual environment can be a challenge. Not with LicenseWatch. Our Citrix and VMware Connector will tell you exactly what you have and how it is used in these environments.

Software identification

LicenseWatch Software DNA Database will automatically reconcile your Capa-Installer inventory data with license and normalization intelligence. It will categorize the software found so that you can select on what software you want to spend your time and ignore unimportant software like patches/fixes or free software. The software values included in the database will help to quickly identify possible cost savings.

System Requirements

- Windows Server 2003/2008/2012 IIS .NET 3.5 SP2 Installed
- CapaInstaller Version 4.0 or later
- Clients supported: all current Windows, Mac OS/X incl. Mountain Lion, Unix and Linux
- Optional vCenter for VMware connectivity or communication directly with ESX host
- Optional Citrix XenApp Server for managing Citrix published applications

SERVICES AVAILABLE

The reporting capabilities in LicenseWatch provides the necessary information about your assets with up to date accuracy. With over 100 pre-defined reports and a Report Wizard, well informed decisions can now be made. All reports can be exported to Excel, Word or PDF format.
