With LicenseWatch there are no lengthy and costly deployment projects. Typically installed and configured within one working day, you can quickly start gathering your software information.

SERVICES AVAILABLE

- LicenseWatch Quick Scan
- Installation and Setup
- Maintenance
- Software Recognition Service
- Technical Support
- Guaranteed Warranty

Overview

The LicenseWatch Fast ROI Service is a service that quickly will provide you with an overview of the software installed on your network and how it is used. The LicenseWatch Fast ROI Service gather this information from all your workstations, servers, virtual servers and Citrix farms. With the reports delivered by the LicenseWatch Fast ROI Service you quickly can see where you can save on your license costs or where you have potential risks.

Six easy steps

The LicenseWatch Fast ROI Service consists of six easy steps to complete in 90 days.

The first step is to install LicenseWatch Discovery and Compliance Central on a (virtual) server in your network where agents will be deployed to all your systems. LicenseWatch Discovery will collect all the software information from all your systems.

During the second step our LicenseWatch Compliance Central will identify the installed software as applications, including suites or application families that will allow you to use up or downgrade rights of your software. All unidentified software will automatically be sent to the LicenseWatch Software DNA team. The LicenseWatch Software DNA team then

will identify the software and return this information. After all* software has been identified, LicenseWatch Fast ROI will produce the deliverables and provide you with a comprehensive overview of your installed software and where it is used.

The LicenseWatch Fast ROI Service provides you with a condensed overview of what key applications are installed on your Windows and Intel Macintosh systems. It tells you how much and how they are actually used, quickly revealing where you have possible savings on your license costs. The reports from the LicenseWatch Fast ROI can be provided to licensing experts as the basis for advice on your licensing strategy. It will also quickly uncover unused licenses, miss-allocated licenses and over-licensing issues.

* all means software that is installed on 10 or more devices

- 90 day service that provides you with potential cost savings
- See what software you have installed and how it is used
- Software Compliance achieved in six easy steps
- Know the ROI of your Software Asset Management project before you start it

With LicenseWatch Fast ROI you will know upfront what ROI to expect from your Software Asset Management project. No risks and the peace of mind that your project will be a success even before it has been started.

INTEGRATION

When you are using Microsoft SCCM[®] 2012 / 2007 (any version) or Altiris Deployment Suite 6.5 or 7.0 we use the information already available directly with in LicenseWatch using our SCCM Connector or the Altiris Connector

VIRTUAL ENVIRONMENTS

Managing your software assets in a virtual environment can be a challenge. Not with LicenseWatch. Our Citrix and VMWare Connector tell you exactly what you have and how it is used in these environments.

SOFTWARE DNA

Our Software DNA will help you recognizing the software in your environment. It will categorize the software found so you choose on what software you want to spend your time.

INSTALLATION REQUIREMENTS

- (Virtual) Windows Server 2003/2008/2012 with IIS, .NET 3.5 SP2 installed
- Access to a MS SQL Server 2005/2008/2012 database.
- LicenseWatch inventories Windows, Intel Macintosh machines.
- Internet / Intranet availability to machines that need to be monitored (TCP/IP port 80 open).
- Optional SCCM 2012/2007 or Altiris Deployment Solution V6.5 or V7.0.
