

# Software License Manager

Maximize your vendor relationship

LicenseWatch Software License Manager has the leading edge when it comes to interpreting software paper contracts, software invoices, software leases, etc. into an electronic format which can be used by the Software Asset Management system.

***LicenseWatch supports 99% of all types of software contracts, including perpetual, User, Workstation, per Department, per Country, per Project, multiple licenses Single User, Concurrent Usage, Enterprise (Site Licenses), Subscription and OEM.***

LicenseWatch Software License Manager supports user defined fields, which enables the user to define customized input layout, for matching the exact input process. Multi License support enables administrators to type in several contracts or invoices in one process, this saves hundreds of hours work.

#### **Software Lifecycle Management**

LicenseWatch supports the ITIL process for Lifecycle Management, and enables the administrator to follow a specific application from the initial first procurement, through the upgrade to a newer version and the final outdating of the product. This is 100% in compliance with Sarbanes-Oxley and Basel II regulations.

LicenseWatch Software License Manager has full support for software license types, which by the software vendors terms & conditions allow for the use of an older version of a specific software application even when the organization have upgraded to a newer version of the application.

#### **Powerful compliance reporting**

LicenseWatch includes the most powerful compliance reporting for any

Software Asset Management solution on the market. The compliance reports can be made on any level within the organization and does not only show the actual compliance but also the total cost of running a specific application.

#### **Fast Return On Investment**

Start saving money on your software licenses and eliminate incompliance risks by using LicenseWatch. LicenseWatch is quick to implement and easy to use. Our customers see an average Return On Investment between only 3 and 6 months. Join over 650 other customers worldwide.

#### **Key benefits**

- Instant Compliance Status and Reporting
- Comprehensive Contract, License and Vendor management
- Monitor actual software usage versus software licenses purchased
- Connects to Microsoft® SCCM and Altiris Deployment Solution

#### **ABOUT LICENSEWATCH**

LicenseWatch provides you with cost effective control and compliance.

#### **KNOW WHAT YOU HAVE**

Our leading technology quickly tells you what software you have installed, how it is used, and what licenses you have to support this.

#### **QUICK TO IMPLEMENT**

#### **EXTENSIVE REPORTING**

The reporting capabilities in LicenseWatch provides with the necessary information about your assets with up to date accuracy. With over 100 pre-defined reports and a Report Wizard, well informed decisions can now be made. All reports can be exported to Excel, Word or PDF format.

## Technical information

---

### INTEGRATION

When you are using Microsoft SCCM® 2012/2007 (any version) or Altiris Deployment Suite 6.5 or 7.0 we can use the information already available directly with in LicenseWatch using our SCCM Connector or the Altiris Connector.

### VIRTUAL ENVIRONMENTS

Managing your software assets in a virtual environment can be a challenge. Not with LicenseWatch. Our Citrix and VMWare Connector will tell you exactly what you have and how it is used in these environments.

### SOFTWARE DNA

Our Software DNA will help you recognize the software in your environment. It will categorize the software it found so that you can select on what software you want to spend your time.

### SERVICES AVAILABLE

We can provide the following services:

- Installation and Setup
- Maintenance
- Software Recognition Service
- Technical Support
- Guaranteed Warranty
